

F90 Electronic Air Cleaner Honeywell Commercial Air Products

**A highly efficient system for capturing
airborne pollution including tobacco
and cooking smoke, dust, and pollen**

Honeywell

You wouldn't drink this stuff so why breathe it?

It's amazing how much grime collects on electronic air cleaner cells after just a few months of use. This black gunk is actual wash water from a dirty electronic air cleaner cell. It's typical of the amount of microscopic particles captured by the air cleaner between washings. One look at this dirty wash water is enough to convince most people of the effectiveness of their electronic air cleaner.

The F90 is a custom modular system for tough commercial and light industrial indoor air cleaning

- The F90A Self-Contained Electronic Commercial Air Cleaner is ceiling-mounted and reduces airborne contaminants such as tobacco and cooking smoke, dust, and pollen from the air circulated through the unit.
- The F90 provides Coanda air distribution by drawing in dirty air from below, cleaning it electronically, and discharging the clean air in four directions parallel with the ceiling

- Reliability is built right in. A solid state power supply for consistent voltage output, built-in performance indicator, high-low performance switch, commercial duty air cleaner cells and a maintenance free motor with sealed bearings all work together to ensure maximum reliability.
- A three-speed fan switch lets you increase or decrease the amount of delivered air to match the level of indoor air pollutants. An optional wall switch makes changing speeds even easier.
- The F90 air cleaner is easy to install. It's easily mounted. And because it's self-contained, no ductwork changes are necessary. All that's needed is electricity. This means minimum disruption to business while it's being installed.
- The F90 features an attractive, clean appearance. To coordinate with any room décor, units are available in traditional black with wood grain trim or in neutral gray.

F90 Electronic Cell

- Includes a 3 light indicator with the smarts to tell you when it needs to be washed, when there's a problem and when it's operating.
- Optional Activated carbon filter is available as well.

Applications

You will find the F90 electronic air cleaner deployed in spaces where particle counts are typically high as a part of doing business.

- Bingo Halls & Fraternal Clubs
- Restaurants
- Banquet Halls
- Print Shops
- Soldering Stations
- Dental Offices & Labs
- Gymnasiums and Locker Rooms
- Billiard Parlors
- Copy Centers
- Veterinary Clinics & Kennels
- Vo-Tech Schools
- Bowling Centers
- Offices
- Cafeterias
- Smoking Lounges
- Spas and Salons
- Nursing Homes
- Bars and Taverns
- ...and more
